Remote Production Workshop with The Rebel Fleet

The Rebel Fleet in partnership with Moxion is hosting a Remote Production Workshop, for the remainder of New Zealand's Level 4 lockdown.

We'll take you through our on-set production technologies which enable remote direction, review and collaboration, connecting your shoot to key stakeholders off-set.

We have multiple tools on offer to enable your shoots to continue. Take this opportunity to better understand how The Rebel Fleet can help you get shooting once we are all back to work.

[Click here](#) to see our calendar and choose one of our 3 sessions per day for a live demo on how your shoot can work remotely. Follow our easy 'how to' guides and login directly from your isolation station.

Here is what we can offer,

Live Streaming - from on-set

- Stream up to 4 Cameras at a time
- Available to stream from anywhere with at least a 4G internet connection
- Secure, encrypted connection
- Easy step by step set up to stream to all iDevices
- Up to 16 individual stream clients
- Less than 1 second latency

Moxion Immediates

Moxion is connected directly into Qtake and automatically uploads from the on-set system, making clips available for review within 90 seconds of being shot. Immediates enables the Director to be able to look back and see exactly what the camera has shot on-set, organised by shoot day or scene and take.

Need to be a part of the shoot but cant attend in person and dont have the time to watch a live stream constantly? We can set up Moxion Immediates to send a notification each time a new clip arrives, and begin to play. Giving you time in between takes, set ups, or location moves to get on with your other work.

Immediates Facts

- Unlimited users
- Great tool for compiling all media when shooting in multiple time zones, wake up to an ordered run through of the footage shot on the other side of the world
- iPad, Apple TV and browser applications
- License for as long as you need to review the media
- Use Moxion after the shoot for sharing cuts and approvals with your team
- Secure Tier1 security clearance

Remote Edit and Colour Grade

- Remote Edit review anywhere with internet access
- Minimal latency
- Encrypted secure stream
- Review on any iOS device or laptop
- Easy login via email invite
- Reviewing in Auckland? Have The Rebel Fleet set up a calibrated monitor in your office, make sure everyone is seeing the same colour accurate pictures

The Rebel Fleet and Moxion have worked together to provide these workflows on many shoots around the world including Disneys 'Mulan', Warner Brothers 'The Meg', Starz 'Ash vs Evil Dead' among others.
